INDEX to *Proceedings*

AMERICAN CONCRETE INSTITUTE

VOLUME 52—1955-56

From JOURNAL OF THE AMERICAN CONCRETE INSTITUTE, V. 27, September 1955 to June 1956 and Part 2, December 1956

Original contributions to the JOURNAL OF THE AMERICAN CONCRETE INSTITUTE—papers, reports and discussions—are indexed in three categories:

1. Title..... **Cracking in reinforced concrete flexural members (52-54)** Arthur P. Clark Apr. 1956. 851

2. Author..... **Davis, Harold S.**—Properties of high-density concrete made with iron aggregate **(52-44)** Mar. 1956..... 705

3. Subject..... **Deflection**—Beams under impulse load **(52-8)** Sept. 1955..... 93

Numbers in parentheses with each entry constitute the title number of the article. The first portion indicates the number of the *Proceedings* volume (in this case V. 52) in which the topic appears. The month and year indicate the JOURNAL issue. Page numbers of both *Proceedings* and JOURNAL are the same.

Concrete Briefs items and Problems and Practices items carry an identifying **(CB)** or **(P & P)** wherever they are entered in the index.

Dynamic loading—Beams **(CB)** Dec. 1955..... 491

Thin-shell roof—Code requirements **(P&P)** Nov. 1955..... 381

Under the general heading Problems and Practices, all Problems and Practices items have been entered by title; these titles do not appear elsewhere in the index.

The index to Current Reviews published in this volume begins on p. 1475.

The index to technical material published in the "News Letter" sections (not a part of or bound with the *Proceedings*) is found on p. 1487. This index is included for the convenience of readers who retain the monthly issues.

A

Abeles, P. W.
–Disc. Concrete stress distribution in ultimate strength design (**52-28**) Part 2, Dec. 1956..... 1305
–Disc. Ultimate strength design (**52-30**) Part 2, Dec. 1956..... 1333
–Disc. Ultimate flexural strength of prestressed concrete and conventionally reinforced concrete beams (**52-37**) Part 2, Dec. 1956..... 1383
–Disc. Cracking in reinforced concrete flexural members (**52-54**) Part 2, Dec. 1956..... 1433
–Disc. Tensile crack exposure tests of stressed reinforced concrete beams (**52-61**) Part 2, Dec. 1956..... 1451
Abrasion
–Hydraulic structures (**52-18**) Nov. 1955..... 259
–Los Angeles test (**52-34**) Jan. 1956..... 563
Accelerators—Winter concreting (**52-60**) June 1956..... 1025
ACI—Activities reviewed (**52-51**) Apr. 1956..... 817
Adams, Robert F.
–Some factors which influence the strength of bolt anchors in concrete (**52-10**) Oct. 1955..... 131
–Disc. Mixing water control by use of a moisture meter (**52-23**) Part 2, Dec. 1956..... 1209
Admixtures
–Calcium chloride (**CB**) Nov. 1955..... 378
–Effect on autogenous healing (**52-63**) June 1956..... 1083
–Effect on grout (**52-16**) Oct. 1955..... 215
Adsorption—Water in hardened cement paste (**52-55**) Apr. 1956..... 863
Age of concrete—Effect on bond (**52-42**) Feb. 1956..... 661
Aggregate
–Abrasion resistance correlated with concrete strength (**52-34**) Jan. 1956..... 563
–Acceptance tests (**52-58**) May 1956..... 987
–Alkali reactivity (**52-2**) Sept. 1955..... 13
–Anorthoclase—Steam-cured mortars (**52-48**) Mar. 1956..... 771
–Blast furnace slag (**CB**) Oct. 1955..... 227
–Chemical reactivity independent of cement (**52-58**) May 1956..... 987
–Chemical reactivity with cement (**52-58**) May 1956..... 987
–Deleterious characteristics (**52-58**) May 1956. 987
–Effect of mineral composition—Strength of steam-cured mortars (**52-48**) Mar. 1956..... 771
–Effect on concrete shrinkage (**52-36**) Jan. 1956.. 581
–Limonite
–(**52-44**) Mar. 1956..... 705
–(**52-32**) Jan. 1956..... 537
–Magnetite
–(**52-44**) Mar. 1956..... 705
–(**52-32**) Jan. 1956..... 537
–Microcline—Steam-cured mortars (**52-48**) Mar. 1956..... 771
–Physical faults (**52-58**) May 1956..... 987
–Rattler test evaluation (**52-34**) Jan. 1956..... 563
–Steel (**52-44**) Mar. 1956..... 705
–Steel punchings and shot (**52-6**) Sept. 1955... 73
–Steel scrap (**52-32**) Jan. 1956..... 537
–Sulfate reactivity of slag (**CB**) Oct. 1955..... 227
–Thermal incompatibility with matrix (**52-50**) Mar. 1956..... 791
Aggregate classification—Based on deleterious characteristics (**52-58**) May 1956..... 987
Air-entrained concrete
–Long-time study (**52-13**) Oct. 1955..... 159
–Scale resistance (**52-21**) Nov. 1955..... 309
Air entrainment
–Effect on durability (**52-61**) June 1956..... 1049
–Surface-active agents (**52-65**) June 1956..... 1115
–Winter concreting (**52-60**) June 1956..... 1025
Air entrainment in mortars (**52-65**) G. M. Bruere, June 1956..... 1115
Airfields—Pavement design and construction (**52-31**) Jan. 1956..... 525
Alkali-aggregate reaction—Mechanisms (**52-2**) Sept. 1955..... 13
Allen, E. A.—Waterstops in articulated concrete construction (**52-7**) Sept. 1955..... 83
Alumina cement—Effect on frost damage to fresh concrete (**52-35**) Jan. 1956..... 573
Analysis and testing of translational shells (**52-64**)
–Mario G. Salvadori, June 1956..... 1099
–Disc. Milo S. Ketchum, Gunhard Oravas and Author Part 2, Dec. 1956..... 1459
Anchor bolts—Strength (**52-10**) Oct. 1955..... 131
Anchors—Form—Load testing (**52-11**) Oct. 1955..... 139
Anderegg, Frederick O.—Disc. Effect of chemical nature of aggregate on strength of steam-cured portland cement mortars (**52-48**) Part 2, Dec. 1956..... 1403
Anorthoclase—Aggregate — Steam-cured mortars (**52-48**) Mar. 1956..... 771
Antifreezes—Winter concreting (**52-60**) June 1956..... 1025
Arch rib—Falsework (**52-14**) Oct. 1955..... 195
Architectural integration of lift-slab techniques (**52-3**) Eberle M. Smith, Sept. 1955... 35
Ashdown, A. J.—Disc. Concrete stress distribution in ultimate strength design (**52-28**) Part 2, Dec. 1956..... 1305
Atomic blast resistance—Beams (**CB**) Dec. 1955..... 491
Au, Tung
–Design of effectively bonded T-beam (**CB**) Oct. 1955..... 225
–Disc. Proposed revision of building code requirements for reinforced concrete (ACI 318-51) (**52-26**) Part 2, Dec. 1956..... 1253
Autogenous healing of cement paste (**52-63**)
–Kenneth R. Lauer and Floyd O. Slate, June 1956..... 1083
–Disc. Robert S. Rowe Part 2, Dec. 1956..... 1457

B

Backfilling—Prepacked concrete—Construction (**52-20**) Nov. 1955..... 287
Baffles—Stilling basin—Repair (**52-52**) Apr. 1956 821
Baker, A. L. L.—Disc. Concrete stress distribution in ultimate strength design (**52-28**) Part 2, Dec. 1956..... 1305
Balog, Louis—Disc. Proposed revision of building code requirements for reinforced concrete (ACI 318-51) (**52-26**) Part 2, Dec. 1956... 1253
Basis for classifying deleterious characteristics of concrete aggregate materials (**52-58**)
–E. G. Swenson and V. Chaly, May 1956..... 987
–Disc. Paul J. Fluss and Stanton Walker, and R. D. Gaynor Part 2, Dec. 1956..... 1447
Batching—Moisture control by meter (**52-23**) Nov. 1955..... 341
Batching controls—Testing (**52-38**) Feb. 1956.. 621
Batching equipment—Corps of Engineers requirements (**52-38**) Feb. 1956..... 621
Batson, G. B.—Disc. Rattler losses correlated with compressive strength of concrete (**52-34**) Part 2, Dec. 1956..... 1373
Beams
–Blast resistance (**CB**) Dec. 1955..... 491
–Castellated T-section—Bond with slab (**CB**) Oct. 1955..... 225
–Code regulations on shear (**P&P**) Nov. 1955.. 382
–Composite—Highway bridges (**CB**) May 1956.. 1013
–Continuous—Creep (**52-33**) Jan. 1956..... 549
–Design constants for variable section (**52-53**) Apr. 1956..... 839
–Edge—Cylindrical shells (**52-29**) Dec. 1955.... 481
–Impulse testing (**52-8**) Sept. 1955..... 93
–Lateral support (**P&P**) Nov. 1955..... 381
–Load capacity in bending (**52-47**) Mar. 1956.. 767
–Prestressed—Ultimate flexural strength (**52-37**) Feb. 1956..... 601
–Prismatic—Moment design (**52-25**) Nov. 1955.. 361
–Stiffened—Prestressed bridge (**52-22**) Nov. 1955..... 327
–Tensile crack exposure tests (**52-61**) June 1956. 1049
–Tensile cracks (**52-54**) Apr. 1956..... 851
–Tests on lapped splices (**52-15**) Oct. 1955..... 201
–Ultimate moment determination (**52-24**) Nov. 1955..... 349
–Ultimate strength analysis (**52-37**) Feb. 1956... 601
–Ultimate strength design (**52-30**) Jan. 1956.... 505
–Web reinforcement (**P&P**) May 1956..... 1014
Beardsley, G. W.—Rattler losses correlated with compressive strength of concrete (**52-34**) Jan. 1956..... 563
Bending—Load capacity of beams (**52-47**) Mar. 1956..... 767

Bernhardt, C. J.—Damage due to freezing of fresh concrete (**52-35**) Jan. 1956 573
Bernholtz, B.—Disc. Evaluation of compression test results of field concrete (**52-17**) Part 2, Dec. 1956 1165
Best, Cecil H. — Disc. Properties and uses of initially retarded concrete (**52-19**) Part 2, Dec. 1956 1187
Better concrete in slope paving by use of slip-forms (52-1)
–William J. Robinson and Lewis H. Tuthill, Sept. 1955 1
–Disc. M. J. Hawkins Part 2, Dec. 1956 1137
Billington, David P.—Building frames in prestressed concrete (**52-62**) June 1956 1065
Bjuggren, Ulf
–Disc. Concrete stress distribution in ultimate strength design (**52-28**) Part 2, Dec. 1956 1305
–Disc. Effect of aggregate on shrinkage of concrete and a hypothesis concerning shrinkage (**52-36**) Part 2, Dec. 1956 1379
Blast furnace slag in concrete (CB) R. H. Bogue, Oct. 1955 227
Blast resistant construction—Beams (**CB**) Dec. 1955 491
Bleeding—Effect of atmospheric conditions on (**52-21**) Nov. 1955 309
Blisters
–Causes in fresh concrete (**P&P**) Dec. 1955 493
–Causes in hardened slabs (**P&P**) Dec. 1955 493
Block—Desirable characteristics (**P&P**) Mar. 1956 802
Bogue, R. H.—Blast furnace slag in concrete (**CB**) Oct. 1955 227
Bolt anchors
–Multiple expansion unit (**52-10**) Oct. 1955 131
–Pull-out tests (**52-10**) Oct. 1955 131
–Strength (**52-10**) Oct. 1955 131
Bond
–Adhesive stage (**52-42**) Feb. 1956 661
–Between precast and cast-in-place concrete—Code regulations (**P&P**) Nov. 1955 382
–Effect of age (**52-42**) Feb. 1956 661
–Failure due to longitudinal splitting (**52-15**) Oct. 1955 201
–Frictional stage (**52-42**) Feb. 1956 661
–Pre-tensioned concrete (**52-41**) Feb. 1956 649
–Strength—Lapped splices (**52-15**) Oct. 1955 ... 201
–T-beam with slab (**CB**) Oct. 1955 225
Bonneville Dam stilling basin repaired after 17 years service (52-52)
–Roy R. Clark, Apr. 1956 821
–Disc. George Gerdes and Author Part 2, Dec. 1956 1417
Brice, L. P. — Disc. Cracking in reinforced concrete flexural members (**52-54**) Part 2, Dec. 1956 1433
Bridge beams —Bending moments (**52-22**) Nov. 1955 327
Bridges
–Arch—Falsework (**52-14**) Oct. 1955 195
–Composite beam use in (**CB**) May 1956 1013
–Deck scaling (**P&P**) Nov. 1955 383
–Multi-beam—Design (**52-22**) Nov. 1955 327
–Prestressed precast hollow girder (**52-46**) Mar. 1956 757
Browne, Frederick L. — Properties of high-density concrete made with iron aggregate (**52-44**) Mar. 1956 705
Bruere, G. M. — Air entrainment in mortars (**52-65**) June 1956 1115
Brunauer, Stephen — Disc. Properties of portland cement pastes cured at elevated temperatures and pressures (**52-43**) Part 2, Dec. 1956. 1393
Bubbles—Causes in fresh concrete (**P&P**) Dec. 1955 493
Building code
–Lateral support requirements (**P & P**) Nov. 1955 381
–Proposed revisions (**52-26**) Dec. 1955 401
Building code change — Web reinforcement (**P&P**) May 1956 1014
Building code requirements for reinforced concrete (ACI 318-56) (52-57) — Committee 318 May 1956 913
Building frames in prestressed concrete (52-62)
–David P. Billington, June 1956 1065
–Disc. Eric C. Molke and Author Part 2, Dec. 1956 1455
Burgess, Woodrow L. — Testing of batching controls and recorders for concrete plants (**52-38**) Feb. 1956 621
Burmeister, Robert A. — Disc. Effect of carbon dioxide on fresh concrete (**52-27**) Part 2, Dec. 1956 1299
Buzzell, D. A. — Disc. Waterstops in articulated concrete construction (**52-7**) Part 2, Dec. 1956 1149

C

Calcite — Chemical durability (**52-2**) Sept. 1955. 13
Calcium chloride
–Cold weather use (**CB**) Nov. 1955 378
–Effect on frost damage to fresh concrete (**52-35**) Jan. 1956 573
Calcium sulfoaluminate —Slag concrete (**CB**) Oct. 1955 227
Campbell-Allen, D.—Disc. Evaluation of compression test results of field concrete (**52-17**) Part 2, Dec. 1956 1165
Canal lining—Slip-forms (**52-1**) Sept. 1955 ... 1
Cantilever forms—Anchor-holding strength (**52-11**) Oct. 1955 139
Capillary pore volume—Hardened cement paste (**52-39**) Feb. 1956 633
Carbon dioxide — Effect on fresh concrete (**52-27**) Dec. 1955 447
Carbonation — Damage of fresh concrete surfaces (**52-27**) Dec. 1955 447
Carmel, T. — Large prestressed concrete elevated tank for Dallas, Texas (**52-40**) Feb. 1956 641
Carry-over factor—Determination for beams of variable section (**52-53**) Apr. 1956 839
Castellation—T-beam design (**CB**) Oct. 1955 ... 225
Casting procedure—Prestressed members (**52-59**) May 1956 1003
Cavitation
–Hydraulic structures (**52-18**) Nov. 1955 259
–Stilling basin — Bonneville Dam (**52-52**) Apr. 1956 821
Cavitation resistance —Test for (**52-52**) Apr. 1956 821
Cement
–Bleeding characteristics (**52-13**) Oct. 1955 159
–Concrete strength tests (**52-13**) Oct. 1955 159
–Floc test (**52-13**) Oct. 1955 159
–Freezing and thawing tests (**52-13**) Oct. 1955 ... 159
–Premature stiffening (**52-13**) Oct. 1955 159
–Shrinkage (**52-13**) Oct. 1955 159
Cement paste
–Autogenous healing (**52-63**) June 1956 1083
–Curing at elevated temperatures and pressures (**52-43**) Feb. 1956 673
–Hardened—Specific volume of evaporable water (**52-55**) Apr. 1956 863
–Matrix—Thermal incompatibility with aggregate (**52-50**) Mar. 1956 791
–Permeability to water (**52-43**) Feb. 1956..... 673
–Pore volume (**52-55**) Apr. 1956 863
–Properties affected by curing temperature and pressure (**52-43**) Feb. 1956 673
Cement performance — Long-time study (**52-13**) Oct. 1955 159
Cements and calcium chloride and cold water (CB) E. L. Howard, Nov. 1955 378
Chaly, V.—Basis for classifying deleterious characteristics of concrete aggregate materials (**52-58**) May 1956 987
Channel shear connectors—Comparison with stud shear connectors (**52-56**) Apr. 1956 875
Chemical attack— Hydraulic structures (**52-18**) Nov. 1955 259
Chemical durability— Alkali-aggregate reactions (**52-2**) Sept. 1955 13
Chinn, James
–Lapped splices in reinforced concrete beams (**52-15**) Oct. 1955 201
–Disc. Ultimate theory in flexure by exponential function (**52-24**) Part 2, Dec. 1956 1215
–Disc. Ultimate strength design (**52-30**) Part 2, Dec. 1956 1333
Clark, Arthur P.— Cracking in reinforced concrete flexural members (**52-54**) Apr. 1956..... 851
Clark, Bruce E.— Theoretical basis of pressure grout penetration (**52-16**) Oct. 1955 215

Clark, Roy R.— Bonneville Dam stilling basin repaired after 17 years service (**52-52**) Apr. 1956 ... 821
Closner, J. J.—Large prestressed concrete elevated tank for Dallas, Texas (**52-40**) Feb. 1956 ... 641
Cold-weather concreting—Calcium chloride admixture for (**CB**) Nov. 1955 ... 378
Collborg, Henning—Mass production of prestressed structural concrete in Sweden (**52-49**) Mar. 1956 ... 781
Colorado Freeway arch bridge—Movable falsework (**52-14**) Oct. 1955 ... 195
Columns
–Concrete-filled pipe—Code requirements (**P&P**) Dec. 1955 ... 492
–Overload tests (**52-45**) Mar. 1956 ... 727
–Sustained load strength—Eccentric loading (**52-45**) Mar. 1956 ... 727
–Ultimate strength design (**52-30**) Jan. 1956 ... 505
Committee
–210 report—Erosion resistance of concrete in hydraulic structures (**52-18**) Nov. 1955 ... 259
–214 report—Evaluation of compression test results of field concrete (**52-17**) Nov. 1955 ... 241
–318 report
–Proposed revision of building code requirements for reinforced concrete (ACI 318-51) (**52-26**) Dec. 1955 ... 401
–Building code requirements for reinforced concrete (ACI 318-56) (**52-57**) May 1956 ... 913
–327 report—Ultimate strength design (**52-30**) Jan. 1956 ... 505
–604 report
–Proposed recommended practice for winter concreting (**52-9**) Oct. 1955 ... 113
–Recommended practice for winter concreting (**52-60**) June 1956 ... 1025
Composite beams
–Highway bridges (**CB**) May 1956 ... 1013
–Prestressed bridge (**52-22**) Nov. 1955 ... 327
Composite construction
–Bond (**P&P**) Nov. 1955 ... 382
–Stud shear connectors (**52-56**) Apr. 1956 ... 875
Composite T-beams—Stud shear connectors (**52-56**) Apr. 1956 ... 875
Compression test data—Use in quality control (**52-17**) Nov. 1955 ... 241
Compressive strength—Aggregate effect on (**52-34**) Jan. 1956 ... 563
Concrete strength variations—Commodore Perry Extension Housing Project (CB) Kenneth Bernard, Mar. 1956 ... 799
Concrete stress distribution in ultimate strength design (52-28)
–Eivind Hognestad, N. W. Hanson, and Douglas McHenry Dec. 1955 ... 455
–Disc. P. W. Abeles, A. J. Ashdown, A. L. L. Baker, Ulf Bjuggren, Henry J. Cowan, Homer M. Hadley, Konrad Hruban, J. M. Prentis, E. Rosenblueth, G. M. Smith and L. E. Young, A. J. Taylor, and Authors Part 2, Dec. 1956 ... 1305
Condensation
–Ceiling of open structure (**P&P**) Mar. 1956 ... 801
–Plastered masonry walls (**P&P**) Oct. 1955 ... 230
Continuous beams—Creep of (**52-33**) Jan. 1956 549
Contractor's look at concrete building, A (CB) M. R. Montgomery, Nov. 1955 ... 375
Control—Batching and recording equipment—Tests of (**52-38**) Feb. 1956 ... 621
Copeland, L. E.
–Porosity of hardened portland cement pastes (**52-39**) Feb. 1956 ... 633
–Specific volume of evaporable water in hardened portland cement pastes (**52-55**) Apr. 1956 ... 863
–Disc. Properties of portland cement pastes cured at elevated temperatures and pressures (**52-43**) Part 2, Dec. 1956 ... 1393
Cordon, William A.
–Properties and uses of initially retarded concrete (**52-19**) Nov. 1955 ... 273
–Disc. Proposed revision of building code requirements for reinforced concrete (ACI 318-51) (**52-26**) Part 2, Dec. 1956 ... 1253
–Disc. Ultimate strength design (**52-30**) Part 2, Dec. 1956 ... 1333
Cores—Test strength related to cylinder strength (**P&P**) Nov. 1955 ... 384
Cowan, Henry J.—Disc. Concrete stress distribution in ultimate strength design (**52-28**) Part 2, Dec. 1956 ... 1305
Crack measurement—Methods and equipment (**52-54**) Apr. 1956 ... 851
Cracking in reinforced concrete flexural members (52-54)
–Arthur P. Clark, Apr. 1956 ... 851
–Disc. P. W. Abeles, L. P. Brice, and K. Hajnal-Kónyi Part 2, Dec. 1956 ... 1433
Cracking resistance
–Floor slabs (**P&P**) Mar. 1956 ... 803
–Masonry construction (**P&P**) Mar. 1956 ... 802
Cracks
–Autogenous healing (**52-63**) June 1956 ... 1083
–Floor (**P&P**) Nov. 1955 ... 384
–Prevention—Reinforcement (**P&P**) Nov. 1955 383
–Tensile—Exposure tests (**52-61**) June 1956 ... 1049
–Tensile—Investigation in slabs and beams (**52-54**) Apr. 1956 ... 851
Crawley, Walter O.—Tests of anchors for mass-concrete forms (**52-11**) Oct. 1955 ... 139
Creep
–Bibliography (**52-4**) Sept. 1955 ... 47
–Continuous beams (**52-33**) Jan. 1956 ... 549
–Theories reviewed (**52-4**) Sept. 1955 ... 47
Crosier, Clayton M.—Disc. Proposed revision of building code requirements for reinforced concrete (ACI 318-51) (**52-26**) Part 2, Dec. 1956 ... 1253
Curing
–Concrete in hydraulic structures (**52-18**) Nov. 1955 ... 259
–Effect on autogenous healing (**52-63**) June 1956 1083
–Effect on cement pastes (**52-43**) Feb. 1956 ... 673
–Pressure effect on cement paste (**52-43**) Feb. 1956 ... 673
–Winter concreting (**52-60**) June 1956 ... 1025
Curing compounds—Petroleum oils (**P&P**) Dec. 1955 ... 494
Cylinders—Test strength related to core strength (**P&P**) Nov. 1955 ... 384
Cylinder strength—Variation coefficient (**CB**) Mar. 1956 ... 799
Cylindrical shells—With edge beam (**52-29**) Dec. 1955 ... 481

D

Dam repair—Stilling basin—Bonneville (**52-52**) Apr. 1956 ... 821
Damage due to freezing of fresh concrete (**52-35**) C. J. Bernhardt, Jan. 1956 ... 573
Davis, Harold S.
–Properties of high-density concrete made with iron aggregate (**52-44**) Mar. 1956 ... 705
–Disc. Proportioning of mixes for steel coarse aggregate and limonite and magnetite matrix heavy concretes (**52-32**) Part 2, Dec. 1956 ... 1359
Davis, R. E., Jr.—Kemano penstock tunnel liner backfilled with prepacked concrete (**52-20**) Nov. 1955 ... 287
Dean, W. E.—Disc. Two bridges of reinforced vacuum concrete, built in Sicily (Italy) (**52-46**) Part 2, Dec. 1956 ... 1401
Deflection—Beams under impulse load (**52-8**) Sept. 1955 ... 93
Design and construction of heavy-duty pavements at Edwards Air Force Base (52-31)
–Robert J. Shultz and Robert B. Fatherson, Jan. 1956 ... 525
–Disc. Wayne R. Wooley and Authors Part 2, Dec. 1956 ... 1355
Design constants for beams of variable section (52-53)
–Max W. Strauss, Apr. 1956 ... 839
–Disc. Reidar K. Formo, R. V. Hauer, and Herman Tachau Part 2, Dec. 1956 ... 1419
Design of blast resistant construction for atomic explosions (CB) Gilbert Huyghe Dec. 1955 ... 491
Design of cylindrical shells with edge beam (52-29)
–L. Fischer, Dec. 1955 ... 481
–Disc. H. S. Gedizli Part 2, Dec. 1956 ... 1331
Design of effectively bonded T-beam (CB) Tung Au and Joseph C. Watts, Oct. 1955 ... 225

Design of prestressed concrete multi-beam bridges with diaphragms and stiffened exterior beams (52-22)
–Andrew Gallia, Nov. 1955 ... 327
–Disc. Y. Guyon, P. B. Morice, E. Van Walsum, and Author Part 2, Dec. 1956 ... 1201
Diaphragms—Use in prestressed multi-beam bridges (**52-22**) Nov. 1955 ... 327
Dodecylamine hydrochloride—Air-entraining capacity (**52-65**) June 1956 ... 1115
Durability
–Chemical—Aggregate (**52-2**) Sept. 1955 ... 13
–Long-time study concretes (**52-13**) Oct. 1955 ... 159
–Physical factors affecting (**52-50**) Mar. 1956 ... 791
–Tensile crack exposure tests (**52-61**) June 1956 ... 1049
Dynamic load—Beam tests (**52-8**) Sept. 1955 ... 93
Dynamic loading—Beams (**CB**) Dec. 1955 ... 491

E

Earthquake loading—Ultimate strength design (**52-30**) Jan. 1956 ... 505
Edge beams—With cylindrical shell (**52-29**) Dec. 1955 ... 481
Edwards Air Force Base—Pavement design and construction (**52-31**) Jan. 1956 ... 525
Effect of age of concrete on bond (52-42) K. R. Peattie and J. A. Pope, Feb. 1956 ... 661
Effect of aggregate on shrinkage of concrete and a hypothesis concerning shrinkage (52-36)
–Gerald Pickett, Jan. 1956 ... 581
–Disc. Ulf Bjuggren and A. M. Neville Part 2, Dec. 1956 ... 1379
Effect of atmospheric conditions during the bleeding period and time of finishing on the scale resistance of concrete (52-21) Paul Klieger, Nov. 1955 ... 309
Effect of carbon dioxide on fresh concrete (52-27)
–J. A. Kauer and R. L. Freeman, Dec. 1955 ... 447
–Disc. Robert A. Burmeister, George Verbeck, H. C. Vollmer, and Authors Part 2, Dec. 1956 ... 1299
Effect of chemical nature of aggregate on strength of steam-cured portland cement mortars (52-48)
–T. Thorvaldson, Mar. 1956 ... 771
–Disc. Frederick O. Anderegg, Dalton G. Miller, Elmer L. Munger, M. Spindel, and Authors Part 2, Dec. 1956 ... 1403
Efsen, Axel—Disc. Simple moments and moment design (**52-25**) Part 2, Dec. 1956 ... 1225
Elastic after-effect theory—Creep (**52-4**) Sept. 1955 ... 47
Elfert, Ralph J., Jr.—Disc. Mixing water control by use of a moisure meter (**52-23**) Part 2, Dec. 1956 ... 1209
Ellsberg, Harry—Disc. Proposed revision of building code requirements for reinforced concrete (ACI 318-51) (**52-26**) Part 2, Dec. 1956 ... 1253
Elstner, R. C.—Sustained load strength of eccentrically loaded short reinforced concrete columns (**52-45**) Mar. 1956 ... 727
Erection and handling—Prestressed precast members (**52-49**) Mar. 1956 ... 781
Eroded concrete—Repairs (**52-18**) Nov. 1955 ... 259
Erosion
–Hydraulic structures (**52-18**) Nov. 1955 ... 259
–Stilling basin—Bonneville Dam (**52-52**) Apr. 1956 ... 821
Erosion resistance—Proportioning for (**52-18**) Nov. 1955 ... 259
Erosion resistance of concrete in hydraulic structures (52-18)
–Committee 210 Nov. 1955 ... 259
–Disc. F. T. Mavis, C. J. Posey, and Committee Part 2, Dec. 1956 ... 1183
Evaluation of compression test results of field concrete (52-17)
–Committee 214 Nov. 1955 ... 241
–Disc. B. Bernholtz, D. Campbell-Allen, C. J. Posey, Edmund A. Pratt, Fred S. Reagel, T. F. Willis and L. T. Murray, and Committee Part 2, Dec. 1956 ... 1165
Evans, W. S.—Disc. Rattler losses correlated with compressive strength of concrete (**52-34**) Part 2, Dec. 1956 ... 1373

F

Falsework—Arch bridge (**52-14**) Oct. 1955 ... 195
Fatherson, Robert B.—Design and construction of heavy-duty pavements at Edwards Air Force Base (**52-31**) Jan. 1956 ... 525
Feld, Jacob—Disc. Proposed revision of building code requirements for reinforced concrete (ACI 318-51) (**52-26**) Part 2, Dec. 1956 ... 1253
Feldspar—Soda-lime series—Aggregate in steam-cured mortar (**52-48**) Mar. 1956 ... 771
Ferguson, Phil M.—Lapped splices in reinforced concrete beams (**52-15**) Oct. 1955 ... 201
Fiesenheiser, E. I.—Heavy steel-aggregate in concrete (**52-6**) Sept. 1955 ... 73
Finishing—Bubbles and blisters during troweling (**P&P**) Dec. 1955 ... 493
Finishing time—Effect on scale resistance (**52-21**) Nov. 1955 ... 309
Fischer, L.—Design of cylindrical shells with edge beams (**52-29**) Dec. 1955 ... 481
Fixed-end moments—Determination for beams of variable section (**52-53**) Apr. 1956 ... 839
Flat slab—Definition (**P&P**) Nov. 1955 ... 382
Flexural behavior—Prestressed and conventional beams (**52-37**) Feb. 1956 ... 601
Flexural theories—Ultimate strength design (**52-28**) Dec. 1955 ... 455
Flexure—Ultimate theory based on exponential function (**52-24**) Nov. 1955 ... 349
Floors
–Crack prevention (**P&P**) Nov. 1955 ... 384
–Slab—Shrinkage reinforcement (**P&P**) Mar. 1956 ... 803
–Surface—Carbonation damage (**52-27**) Dec. 1955 ... 447
Fluck, P. G.—Plastic flow (creep) of reinforced concrete continuous beams (**52-33**) Jan. 1956 ... 549
Fluss, Paul J.—Disc. Basis for classifying deleterious characteristics of concrete aggregate materials (**52-53**) Part 2, Dec. 1956 ... 1419
Fly ash-sulfur mixture for capping concrete test cylinders (CB) P. J. Freeman, Dec. 1955 ... 491
Folded plate roof—Code requirements (**P&P**) Nov. 1955 ... 381
Form anchors—Holding strength (**52-11**) Oct. 1955 ... 139
Form removal—Winter concreting (**52-60**) June 1956 ... 1025
Formo, Reidar K.—Disc. Design constants for beams of variable section (**52-53**) Part 2, Dec. 1956 ... 1419
Forms
–Cantilever—Mass concrete—Anchor tests (**52-11**) Oct. 1955 ... 139
–Erection—Arch bridge (**52-14**) Oct. 1955 ... 195
Foster, B.E.—Disc. Heavy steel-aggregate concrete (**52-6**) Part 2, Dec. 1956 ... 1143
Fountain, R. S.—Disc. Investigation of stud shear connectors for composite concrete and steel I-beams (**52-56**) Part 2, Dec. 1956 ... 1441
Frame—Prestressed—Analysis (**52-62**) June 1956 ... 1065
Freeman, P. J.—Fly ash-sulfur mixture for capping concrete test cylinders (**CB**) Dec. 1955 ... 491
Freeman, R. L.—Effect of carbon dioxide on fresh concrete (**52-27**) Dec. 1955 ... 447
Freezing—Fresh concrete damage (**52-35**) Jan. 1956 ... 573
Freezing and thawing tests—Correlation with field performance (**52-13**) Oct. 1955 ... 159
Friberg, Bengt F.—Plastic flow (creep) of reinforced concrete continuous beams (**52-33**) Part 2, Dec. 1956 ... 1369
Frost damage—Fresh concrete (**52-35**) Jan. 1956 ... 573
Frost resistance—Long-time study concretes (**52-13**) Oct. 1955 ... 159
Fucik, Frank M.—More about waterstops (**CB**) Dec. 1955 ... 48

G

Gallia, Andrew—Design of prestressed concrete multi-beam bridges with diaphragms and stiffened exterior beams (**52-22**) Nov. 1955 ... 327

Gaynor, R. D.—Disc. Basis for classifying deleterious characteristics of concrete aggregate materials (**52-58**) Part 2, Dec. 1956 1447
Gedizli, H. S.—Disc. Design of cylindrical shells with edge beam (**52-29**) Part 2, Dec. 1956 1331
Gel pore volume—Hardened cement paste (**52-39**) Feb. 1956 633
Gel structure—Shrinkage hypothesis (**52-36**) Jan. 1956 581
Gerdes, George—Bonneville Dam stilling basin repaired after 17 years' service (**52-52**) Part 2, Dec. 1956 1065
Girders—Prestressed building frame components (**52-62**) June 1956 1065
–Prestressed hollow precast (**52-46**) Mar. 1956 ... 757
Griffin, P. G.—Movable falsework speeds arch rib construction (**52-14**) Oct. 1955 195
Grout
–Bleeding (**52-16**) Oct. 1955 215

Thompson, J. Neils—Lapped splices in reinforced concrete beams (**52-15**) Oct. 1955 ... 201
Thorsen, Niels—Use of large tendons in pretensioned concrete (**52-41**) Feb. 1956 ... 649
Thorvaldson, T.—Effect of chemical nature of aggregate on strength of steam-cured portland cement mortars (**52-48**) Mar. 1956 ... 771
Thurlimann, Bruno—Disc. Ultimate strength design (**52-30**) Part 2, Dec. 1956 ... 1333
Three-way slab—Design (**P&P**) Nov. 1955 ... 383
Translational shells—Analysis and testing (**52-64**) June 1956 ... 1099
Triton NE—Air-entraining capacity (**52-65**) June 1956 ... 1115
Tunnel—Construction—Prepacked backfill for liner (**52-20**) Nov. 1955 ... 287
Tuthill, Lewis H.
–Better concrete in slope paving by use of slipforms (**52-1**) Sept. 1955 ... 1
–Properties and uses of initially retarded concrete (**52-19**) Nov. 1955 ... 273
Two prestressed concrete bridges with hollow girders of precast vacuum-treated elements (52-46)
–R. Morandi and F. Piccinini, Mar. 1956 ... 757
–Disc. W. E. Dean Part 2, Dec. 1956 ... 1401
Two-way slab—Definition (**P&P**) Nov. 1955 ... 382

U

Ultimate flexural strength of prestressed and conventionally reinforced concrete beams (52-37)
–Jack R. Janney, Eivind Hognestad, and Douglas McHenry, Feb. 1956 ... 601
–Disc. P. W. Abeles, K. Hajnal-Kónyi, Gene M. Nordby, and Authors Part 2, Dec. 1956 ... 1383
Ultimate strength—Columns—Sustained loading (**52-45**) Mar. 1956 ... 727
Ultimate strength analysis
–Prestressed beams (**52-37**) Feb. 1956 ... 601
–Stüssi type (**52-37**) Feb. 1956 ... 601
Ultimate strength design (52-30)
–Committee 327 (Joint ACI-ASCE) Jan. 1956 ... 505
–Disc. P. W. Abeles, James Chinn, William A. Cordon, E. Rosenblueth, Herbert A. Sawyer, Jr., C. P. Siess and R. K. L. Wen, Bruno Thürlimann, and Committee Part 2, Dec. 1956 ... 1333
Ultimate strength design
–History (**52-30**) Jan. 1956 ... 505
–Stress distribution (**52-28**) Dec. 1955 ... 455
Ultimate theory in flexure by exponential function (52-24)
–G. M. Smith and L. E. Young, Nov. 1955 ... 349
–Disc. James Chinn Part 2, Dec. 1956 ... 1215
Use of large tendons in pre-tensioned concrete (52-41)
–Niels Thorsen, Feb. 1956 ... 649
–Disc. H. Kent Preston Part 2, Dec. 1956 ... 1391

V

Vacuum processing—Precast prestressed girders (**52-46**) Mar. 1956 ... 757
Van Alstine, C. B.—Mixing water control by use of a moisture meter (**52-23**) Nov. 1955 ... 341
VanWalsum, E.—Disc. Design of prestressed concrete multi-beam bridges with diaphragms and stiffened exterior beams (**52-22**) Part 2, Dec. 1956 ... 1201
Vapor barrier—Masonry walls (**P&P**) Oct. 1955 ... 230
Verbeck, George—Disc. Effect of carbon dioxide on fresh concrete (**52-27**) Part 2, Dec. 1956 ... 1299
Vibration—Slope paving (**52-1**) Sept. 1955 ... 1
Vibration limit—Hardening concrete (**52-19**) Nov. 1955 ... 273
Viest, I. M.
–Investigation of stud shear connectors for composite concrete and steel T-beams (**52-56**) Apr. 1956 ... 875
–Sustained load strength of eccentrically loaded short reinforced concrete columns (**52-45**) Mar. 1956 ... 727
Viscous theory—Creep (**52-4**) Sept. 1955 ... 47
Vollmer, H. C.—Disc. Effect of carbon dioxide on fresh concrete (**52-27**) Part 2 Dec. 1956 ... 1299
Volume change—Alkali aggregate reaction (**52-2**) Sept. 1955 ... 13

W

Walker, Stanton—Disc. Basis for classifying deleterious characteristics of concrete aggregate materials (**52-58**) Part 2, Dec. 1956 ... 1447
Walls—Masonry—Condensation (**P&P**) Oct. 1955 ... 230
Wasdell, R. V.—Disc. Proposed revision of building code requirements for reinforced concrete (ACI 318-51) (**52-26**) Part 2, Dec. 1956 ... 1253
Washa, G. W.—Plastic flow (creep) of reinforced concrete continuous beams (**52-33**) Jan. 1956 ... 549
Wasil, B. A.—Heavy steel-aggregate in concrete (**52-6**) Sept. 1955 ... 73
Waterstops
–Installation (**CB**) Dec. 1955 ... 489
–Plastic (**CB**) Dec. 1955 ... 489
–Rubber—Prestressed tank (**52-40**) Feb. 1956 ... 641
Waterstops in articulated concrete construction (52-7)
–E. A. Allen and E. C. Higginson, Sept. 1955 ... 83
–Disc. D. A. Buzzell, Bryant Mather, and W. E. Parker Part 2, Dec. 1956 ... 1149
Watts, Joseph C.—Design of effectively bonded T-beam (**CB**) Oct. 1955 ... 225
Weathering—Stressed concrete beams (**52-61**) June 1956 ... 1049
Web reinforcement—Building code changes (**P&P**) May 1956 ... 1014
Welding of continuity splices (CB) I. F. Morrison, Nov. 1955 ... 380
Wen, R. K. L.—Disc. Ultimate strength design (**52-30**) Part 2, Dec. 1956 ... 1333
Wendell, G. E.
–Kemano penstock tunnel liner backfilled with prepacked concrete (**52-20**) Nov. 1955 ... 287
Wetting agents—Performance requirements (**52-19**) Nov. 1955 ... 273
White, Ardis
–Summary of composite bridge beam questionnaire survey (**CB**) May 1956 ... 1013
White, Merit P.
–Disc. Impulse testing of concrete beams (**52-8**) Part 2, Dec. 1956 ... 1153
Whitney, Charles S.—Year in review (**52-51**) Apr. 1956 ... 817
Willetts, Cecil H.—Testing of batching controls and recorders for concrete plants (**52-38**) Feb. 1956 ... 621
Willis, T. F.—Disc. Evaluation of compression test results of field concrete (**52-17**) Part 2, Dec. 1956 ... 1165
Wind loading—Ultimate strength design (**52-30**) Jan. 1956 ... 505
Winter concreting
–Carbonation caused by heating devices (**52-27**) Dec. 1955 ... 447

–Code requirements (**P&P**) Mar. 1956..... 803
–Objectives (**52-60**) June 1956..... 1025
–Proposed revisions of ACI standards (**P&P**) Mar. 1956..... 803
–Recommended practice
–ACI standard (**52-60**) June 1956..... 1025
–Proposed standard (**52-9**) Oct. 1955..... 113

Wisniski, W. H.—Disc. Mixing water control by use of a moisture meter (**52-23**) Part 2, Dec. 1956..... 1209

Witter, Harry C. — Properties of high-density concrete made with iron aggregate (**52-44**) Mar. 1956..... 705

Woolley, Wayne R. — Disc. Design and construction of heavy-duty airfield pavements at Edwards Air Force Base (**52-31**) Part 2, Dec. 1956..... 1355

Y

Year in review (52-51) Charles S. Whitney, Apr. 1956..... 817

Young, L. E.
–Ultimate theory in flexure by exponential function (**52-24**) Nov. 1955..... 349
–Disc. Concrete stress distribution in ultimate strength design (**52-28**) Part 2, Dec. 1956..... 1305

Z

Zweig, Alfred—Disc. Proposed revision of building code requirements for reinforced concrete (ACI 318-51) (**52-26**) Part 2, Dec. 1956... 1253

INDEX

Current Reviews

From Journal of American Concrete Institute, V. 27, Sept. 1955 to June 1956

A

Absorption—Capillary—Mortar. *Zement-Kalk-Gips* ... 397
Acid resistance
-Cement mortar. *Journal of Ceramic Association of Japan* ... 394
-"Ocrate" mortar. *Rock Products* ... 1131
Admixtures
-Artificial resins. *Zement-Kalk-Gips* ... 810
-Compilation of test results. *Joint Research Laboratory Publication, National Sand and Gravel Association and National Ready Mixed Concrete Association* ... 810
-Effectiveness related to W/C ratio. *Australian Journal of Applied Science* ... 397
-Fly ash. *Proceedings, ASTM* ... 108
-Fly ash. *Revue des Materiaux de Construction* ... 109
Aggregate
-Action of sulfide minerals in. *Betong* ... 500
-Coral. *Civil Engineering* ... 389
-Fine—Processing of. *La Technique Moderne-Construction* ... 810
-Gap-grading for vibrated concrete. *Engineering* ... 498
-Influence on form variation and stresses in artificial stone. *Zement-Kalk-Gips* ... 395
-Lightweight. *Lightweight Concretes* ... 910
-Lightweight—Expanded shale and clay. *Constructional Review* ... 897
-Lightweight for structural concrete. *Proceedings, ASCE* ... 236
-Measuring surface texture. *Magazine of Concrete Research* ... 1129
-Petrographic examination. *Proceedings, ASTM* ... 109
-Quality—Effect of clay. *California Highways and Public Works* ... 1129
-Reactivity with alkali. *Australian Journal of Applied Science* ... 396
-Reactivity with cement—Test for. *Proceedings, ASTM* ... 239
-Sand—Fine-grained. *Vestnik Akad. Nauk Kazokh* ... 108
-Schüttbeton (rubble). *Bulletin, Deutscher Ausschuss für Stahlbeton* ... 498
-Significance of tests and properties. *Special Technical Publication, ASTM* ... 905
-Sulfate soundness test. *Public Roads* ... 898
-Wood. *Lightweight Concretes* ... 910
Aggregate grading—Effect on mix proportions. *Zement und Beton* ... 695
Aggregate testing—Survey. *Proceedings, Institution of Civil Engineers* ... 695
Air entrainment
-Admixtures—Japan. *Transactions, Japan Society of Civil Engineers* ... 390
-Concrete properties. *Transactions, Japan Society of Civil Engineers* ... 390
-Effect in pavement concrete with pozzolanic admixture. *Proceedings, Highway Research Board* ... 900
-Effect on strength and dynamic modulus of elasticity. *Der Bauingenieur* ... 1022
-Sulfite alcohol wash water effect. *Gidrotekhnicheskoe Stroitel'stvo* ... 701
Air terminal
-Construction. *Informes de la Construccion* ... 387
-Renfrew—Building design. *Concrete and Constructional Engineering* ... 104
Airfields
-Overlay pavements—Design. *Proceedings, ASCE* ... 597
-Pavement—Model studies. *Proceedings, Highway Research Board* ... 900
-Pavement—Rigid. *Bulletin, Instituto Tecnico de la Construccion y del Cemento* ... 392
-Pavement—Design. *Proceedings, Institution of Civil Engineers* ... 499
Airport—Concrete production and placing. *Beton- und Stahlbetonbau* ... 1125
Airport pavements—Design and construction. *Informes de la Construccion* ... 110
Airport runway—Thick slab. *World Construction* 899
Alkali
-Cement—Determination in. *ASTM Bulletin* ... 1020
-Pozzolans activated by. *Australian Journal of Applied Science* ... 595
Aluminous cement—Re-crystallization. *Nase Gradevinarstvo* ... 811
Analysis of structures. Smolira. Concrete Publications, Ltd. ... 895
Anchorage—Prestressed members. *Civil Engineering and Public Works Review* ... 902
Annular section—Stress distribution under eccentric load. *Proceedings, ASCE* ... 389
Aqueduct
-Construction. *The Engineer* ... 693
-Design—Box culvert type. *Indian Concrete Journal* ... 234
Arch action—Masonry walls. *Proceedings, ASCE* 1127
Arch bridges
-Construction. *Gradbeni Vestnik* ... 689
-Construction. *Engineering* ... 893
-Construction. *Travaux* ... 231
-Construction. *Annales des Ponts et Chaussees* ... 690
-Precast and cast in place elements combined. *Informes de la Construccion* ... 893
-Reconstruction. *Gradbeni Vestnik* ... 689
Arch dam
-Review. *Proceedings, ASCE* ... 1126
-Stress analysis—Trial load method. *Proceedings, ASCE* ... 1127
-Tests and analyses. *Proceedings, ASCE* ... 233
Arch frame
-Analysis. *Concrete and Constructional Engineering* ... 107
-Hangar construction. *Travaux* ... 392
-Precast. *The Engineer. Engineering* ... 812
-Precast—Church. *Civil Engineer Corps Bulletin* ... 1125
Arch roof
-Portable falsework supported. *Contractors and Engineers* ... 387
-Precast. *Concrete and Constructional Engineering* ... 812
-Ribless parabolic—India. *Indian Concrete Journal* ... 105
Arches
-Composite (precast and cast-in-place)—Creep and shrinkage. *Beton-und Stahlbetonbau* ... 1128
-Precast—Church construction. *Constructional Review* ... 894
-Precast prestressed. *Prefabrication* ... 392
-Secondary stress evaluation. *Il Cemento* ... 234
Architectural concrete
-*Architectural construction* ... 1125
-Precast panels. *Prefabrication* ... 1021
Architectural construction. Crane. John Wiley & Sons, Inc. ... 1125
Architectural data—Compilation. *Building, planning and design standards* ... 907
Architectural engineering. *Architectural construction* ... 1125
Architectural engineering. Editors of *Architectural Record*, F. W. Dodge Corp. ... 600
Auditorium—Hamburg—Design and construction. *Beton- und Stahlbetonbau* ... 894
Autogenous healing
-Compressed concrete. *The Structural Engineer* 394
-Effect on freeze-thaw tests. *Bulletin, Swedish Cement and Concrete Research Institute* ... 1130

B

Bars—Shape-strength in bending and twisting. *Der Bauingenieur* ... 816
Batching methods. *Seire Divulgacao* ... 700
Batching plant
–Description of layout. *Contractors and Engineers* ... 907
–Punch card control. *Rock Products* ... 908
Beams
–Aged post-tensioned—Crack development. *Il Cemento* ... 503
–Bending under transverse loading. *Engineering* ... 809
–Circular.—*Bygningsstatiske Meddelelser* ... 1128
–Composite—Bond in. *Der Bauingenieur* ... 695
–Continuous—Safe load. *Bulletin of the Faculty of Engineering, Cairo University* ... 1023
–Continuous prestressed. *Proceedings, ASCE* ... 112
–Continuous prestressed—Tests. *Bulletin Instituto Tecnico de la Construccion y del Cemento* ... 112
–Continuous prestressed with straight cables. *Inzynieria i Budownictwo* ... 904
–Crack formation. *Technical News Bulletin, U. S. National Bureau of Standards* ... 1023
–Deflection—Determination. *Bulletin of the Faculty of Engineering, Cairo University* ... 1023
–Hollow precast. *The Engineer* ... 392
–Models—Photoelastic study. *Applied Scientific Research* ... 1024
–Plastic design. *Cement* ... 814
–Plastic hinge theory of. *Concrete and Constructional Engineering* ... 810
–Deformation and buckling. *Annales des Ponts et Chaussees* ... 594
–Elastic constants measured by means of vibrations. *Betong* ... 595
–Prestressed—Combined loading. *Magazine of Concrete Research* ... 398
–Prestressed—Design charts. *Proceedings, Institution of Civil Engineers* ... 393
–Prestressed—End anchorages. *The Structural Engineer* ... 597
–Prestressed—Standardisation. *Cement* ... 238
–Prestressed—Straight-line cables. *Inzynieria i Budownictwo* ... 698
–Prestrassed—Stress measurement. *Constructional Review* ... 906
–Prestressed—Tension loss. *Giornale del Genio Civile* ... 238
–Prestressed I-shape. *L'Ingenieur* ... 691
–Prestressed, precast. *Precontrainte* ... 691
–Prestressed with wire. *Engineering. The Engineer* ... 394
–Shear stresses. *Der Bauingenieur* ... 389
–Shearing strength. *Bulletin, University of Illinois Engineering Experiment Station* ... 813
–Ultimate strength design. *Transactions, Japan Society of Civil Engineers* ... 107
Beat-frequency apparatus—Determination of elastic modulus. *Engineering* ... 905
Bending—Annular sections. *Proceedings, ASCE* ... 389
Bending and axial forces—Column design. *Concrete and Constructional Engineering* ... 107
Blast resistance
–Building frames. *Proceedings, ASCE* ... 497
–Concrete houses. *Concrete* ... 238
Blaine method—Fineness of pozzolans. *Australian Journal of Applied Science* ... 898
Bomb shelters—Hospital, underground. *VDI Zeitschrift* ... 704
Bond
–Prestressed concrete. *Constructional Review* ... 903
–Prestressed concrete—X-ray determination. *Proceedings, Institution of Civil Engineers* ... 598
Boring equipment. *Drillings and borings* ... 816
Box culvert—Design. *Indian Concrete Journal* ... 234
Box girders
–Hollow. *Concrete and Constructional Engineering* ... 105
–Prestressed. *Civil Engineering* ... 691
Bridge floors—Research on. *University of Illinois Bulletin* ... 702
Bridge piers—Plastic hinges at top. *Nase Gradevinarstvo* ... 805
Bridge slab—Load distribution. *Magazine of Concrete Research* ... 1017
Bridges
–Arch—Cast-in-place combined with precast members. *Informes de la Construccion* ... 893
–Arch—Construction. *Gradbeni Vestnik* ... 689
–Arch—Construction. *Engineering* ... 893
–Arch—Construction. *Annales des Ponts et Chaussees* ... 690
–Arch construction. *Travaux* ... 231
–Arch—Melan type. *Betong* ... 495
–Arch—1915 and 1955 compared. *Betong* ... 591
–Arch—Reconstruction. *Gradbeni Vestnik* ... 689
–Cantilever slab—Design. *Concrete and Constructional Engineering* ... 495
–Composite construction. *Der Bauingenieur* ... 690
–Composite construction—Continuous girders—Jointless deck. *Der Bauingenieur* ... 385
–Composite (precast and cast-in-place)—Creep and shrinkage. *Beton- und Stahlbetonbau* ... 1128
–Construction of trestle. *Contractors and Engineers* ... 231
–Continuous—Analysis. *Nase Gradevinarstvo* ... 805
–Continuous slab, prestressed. *Cement* ... 691
–Continuous three-span. *Der Bauingenieur* ... 690
–Diaphragm stress calculations.—*Annales des Ponts et Chaussees* ... 386
–Dynamic load testing. *Betong* ... 495
–Esthetic considerations. *Annales des Ponts et Chaussees* ... 385
–Esthetic critique. *The Engineer* ... 386
–Monolithic girder—Design. *Bulletin of the Faculty of Engineering, Cairo University* ... 1017
–Precast deck. *Contractors and Engineers* ... 103
–Precast, prestressed components. *Proceedings, Institution of Civil Engineers* ... 591
–Precast, prestressed members. *Contractors and Engineers* ... 103
–Precasting construction. *Contractors and Engineers* ... 231
–Prestressed. *Cement* ... 902
–Prestressed. *The Engineer* ... 385
–Prestressed—Analysis by Guyon-Massonet method. *The Structural Engineer* ... 103
–Prestressed—Concreting operation. *Beton- und Stahlbetonbau* ... 805
–Prestressed—Construction. *Travaux* ... 231
–Prestressed—Construction practices. *Journal, Boston Society of Civil Engineers* ... 805
–Prestressed—Design and construction. *Beton- und Stahlbetonbau* ... 386
–Prestressed—Precast. *Engineering. The Engineer* ... 385
–Prestressed—Reconstruction. *Der Bauingenieur* ... 689
–Prestressed—Strain measurement. *Proceedings. Institution of Engineers (India)* ... 893
–Prestressed—Venezuela. *Revista del Colegio de Ingenieros de Venezuela* ... 598
–Prestressed, cantilever. *Der Bauingenieur* ... 591
–Prestressed, precast. *Roads and Streets* ... 690
–Prestressed precast units for. *Proceedings, Institution of Civil Engineers* ... 495
–Prestressed slab. *Der Bauingenieur* ... 690
–Prestressed slab with stiffened edges. *Concrete and Constructional Engineering* ... 103
–Prestressing practices. *Proceedings, ASCE* ... 597
–Railroad—Impact. *Proceedings, ASCE* ... 503
Buckling
–Coplanar beams. *Annales des Ponts et Chaussees* ... 594
–Portal frames with sidesway. *The Structural Engineer* ... 595
–Single-bay multistory. *The Structuarl Engineer* ... 594
Building code—See also code
Building code requirements for plain and reinforced concrete structures with technical directions. Finnish Concrete Association ... 106
Building, planning and design standards. Sleeper, John Wiley & Sons ... 907
Buildings—High—Selection of structural system. *Bulletin, Transactions Institution of Civil Engineers of Ireland* ... 1024
Buoyancy meter—Measurement of moisture content. *Civil Engineering and Public Works Review* ... 897

Calcium sulfate—Action in cement. *ASTM Bulletin* 1019

Canal lining—Slip forms. *Contractors and Engineers* 806

Canals
–Design and planning. *VDI Zeitschrift* 807

Capping—Effect of on compressive strength of cubes. *Magazine of Concrete Research* 501

Cellular concrete
–Ball impact test for strength. *Betonstein-Zeitung* 911
–Gas. *Prefabrication* 1024
–Shrinkage. *Revue des Materiaux de Construction* 395
–Shrinkage. *La Technique Moderne-Construction* 598

Cement
–Action of gypsum and calcium sulfate. *ASTM Bulletin* 1019
–Blast furnace—Strength affected by clinker quality. *Revue des Materiaux de Construction* 596
–Determination of alkali. *ASTM Bulletin* 1020
–Drying shrinkage—Cracking resistance. *Technical News Bulletin, U. S. National Bureau of Standards* 1019
–Expanding—Basic properties. *Zement-Kalk-Gips* 390
–Fresh and matured—Tests. *Zement-Kalk-Gips* 1129
–Lafarge aluminous—Recrystallization. *Nase Gradevinarstvo* 811
–Manufacturers' handbook. *Handbook for cement engineers* 703
–Pozzolanic—Heat of hydration. *Industria Italiana del Cemento* 696
–Pozzolanic—Properties and applications. *Annali di Chimica* 234
–Properties—Yugoslavia. *Nase Gradevinarstvo* 389
–Reactivity with aggregate. *Australian Journal of Applied Science* 396
–Refractory. *Memoires, Societe des Ingenieurs Civils de France* 498
–Resistance to chemical attack. *Journal of Ceramic Association of Japan* 390
–Shrinkage tests. *Revue des Materiaux de Construction* 700
–Sieving machine. *Zement-Kalk-Gips* 909
–Strength testing. *ASTM Bulletin* 696
–Sulfate and acid resistance. *Journal of Ceramic Association of Japan* 394
–Testing methods. *Zement-Kalk-Gips* 1129

Cement-aggregate reaction—Test for. *Proceedings, ASTM* 239

Cement chemistry—Silicon. *Rock Products* 813

Cement clinker—Energy absorption during pulverization. *VDI, Zeitschrift* 898

Cement content
–Determination for concrete and mortar. *Indian Concrete Journal* 910
–Determination for plastic concrete. *ASTM Bulletin* 696

Cement manufacture—Non-aqueous process. *Preprint, American Society of Mechanical Engineers* 898

Cement paste
–Corrosion by salt solutions. *La Chimica e l'Industria* 595
–Rheology. *British Journal of Applied Physics* 1131

Cement testing
–Plastic mortar method. *Cement* 813
–Statistical examination of errors. *Zement-Kalk-Gips* 596

Chemical resistance—"Ocrate" mortar. *Rock Products* 1131

Chimneys—Analysis. *Der Bauingenieur* 497

Circular beam. *Bygningsstatiske Meddelelser* 1128

Circular cylindrical shells. Rüdiger and Urban. B. G. Teubner Verlagsgesellschaft 1018

Civil engineer—His role in Britain's atomic factories. *Proceedings, Institution of Civil Engineers* 815

Civil engineering research—Progress in. *Proceedings, Institution of Civil Engineers* 504

Clay—Effect on aggregate quality. *California Highways and Public Works* 1129

Clinker—Quality effect on strength of blast furnace cement. *Revue des Materiaux de Construction* 596

Code requirements
–Finland. *Building code requirements for plain and reinforced concrete structures with technical directions* 106
–Prestress concrete—Switzerland. *Il Cemento* 499
–Reinforced concrete—Germany. *German code requirements for reinforced concrete* 107

Codes
–ASTM standards used in. *ASTM standards in building codes* 504
–Comparison of European requirements. *Beton og Jernbeton* 400
–Design procedure—Germany. *Design procedure with numerical tables and examples for application of the German concrete code* 389

Cold weather concreting—Electric curing method. *Journal of Japan Society of Civil Engineers* 693

Collar slab—Dome—Analysis. *Proceedings, ASCE* 1127

Coloring—Pigments for concrete reviewed. *Pit and Quarry* 909

Columns
–Axially loaded—Proposed design. *Beton- und Stahlbetonbau* 896
–Circular—Bending and axial stress. *Concrete and Constructional Engineering* 809
–Corner—Design. *Concrete and Constructional Engineering* 1019
–Design—Bending and axial forces. *Concrete and Constructional Engineering* 107
–Design—Eccentric loading. *Beton- und Stahlbetonbau* 388
–Eccentric loading. *Civil Engineering and Public Works Review* 240
–Precast—Multiple-bay buildings. *Industria Constructilor si a Materialelor de Constructii* 1127
–Rectangular—Design charts. *Commonwealth Engineer* 896
–Rectangular—Ultimate strength design. *Magyar Epitoipar* 895
–Steel encased in concrete—Strength. *Engineering* 911
–Stress analysis of. *Proceedings, Highway Research Board* 896
–Ultimate strength tests, axially loaded. *The Structural Engineer* 702

Composite beams—Bond in. *Der Bauingenieur* 695

Composite construction
–Bridge. *Der Bauingenieur* 385
–Bridge in Germany. *Der Bauingenieur* 690
–Floor and beam interaction. *National Building Studies Research Paper, Building Research Station, Department of Scientific and Industrial Research* 814

Composite girder construction—German Industrial Standard 4239. *Der Bauingenieur* 600

Composite structure—Precast and cast-in-place—Creep and shrinkage. *Beton- und Stahlbetonbau* 1128

Compression testing machine—Electronic. *Cement* 399

Compression tests—Significance evaluated. *Cement* 397

Computation of reinforced concrete. Von Langendonck. Associacao Brasileira do Cimento Portland 694

Concrete materials—Text book. *Technology of cement and concrete—V. 1: Concrete materials* 696

Concrete materials and practice. Murdock. Edward Arnold, Ltd. 1020

Concrete production techniques—Survey. *Proceedings, Institution of Civil Engineers* 911

Concrete products—Germany. *Concrete products yearbook, 1955* 909

Concrete products yearbook, 1955. Bauverlag GmbH 909

Concrete properties—General survey. *Die Bauzeitung* 599

Concrete technology
–Review. *Documentation Technique du Batiment et des Travaux Publics* 1131
–Tests and properties evaluated. *Significance of tests and properties of concrete and concrete aggregates* 905

INDEX to *News Letter*

From Journal of the American Concrete Institute, V. 27, Sept. 1955 to June 1956

An index to technical material published in the "News Letter" sections for readers who retain the monthly issues. The "News Letter" sections are not a part of or bound with the *Proceedings*.

Aggregate
–Pumpable concrete Mar. 1956 NL 5
–Optimum for pipe manufacture Jan. 1956 NL. 9

Air-entraining agents—Pumpable concrete Mar. 1956 NL 5

Airfields—Paving program—U. S. Air Force Oct. 1955 NL 12

Arch roof—Mile High Center, Denver Jan. 1956 NL 25

Blast resistance—Concrete home Feb. 1956 NL 16

Boxes—Corrugated—Forms for lift slab May 1956 NL 16

Bridges
–Composite—Stud shear connectors Apr. 1956 NL 59
–Foundation piers—Mackinac Oct. 1955 NL... 22
–Precast, prestressed—Alaska Sept. 1955 NL... 10

Cement—Characteristics valuable in pipe manufacture Jan. 1956 NL 9

Cold weather concreting—Slip form construction in Finland Feb. 1956 NL 26

Consistency—Control for pipe manufacture Jan. 1956 NL 9

Filler block structural units—Use in vault construction Mar. 1956 NL 10

Fire resistance—Precast roof slabs Oct. 1955 NL 8

Fire station—Roof and trim of reinforced concrete Nov. 1955 NL 21

Forms—Corrugated boxes for lift-slab May 1956 NL 16

Foundations—Mackinac Bridge—Construction Oct. 1955 NL 22

Home design—Blast resistant Feb. 1956 NL... 16

Hyperbolic paraboloids—Model tests Dec. 1955 NL 33

Jet blast resistance—Airfield paving Oct. 1955 NL 12

Lift-slab—Formed with corrugated boxes May 1956 NL 16

Pavements—Airfield—Heavy duty Oct. 1955 NL 12

Pipe manufacture—Concrete technology applied to Jan. 1956 NL 9

Precast members
–Bridge—Alaska Sept. 1955 NL 10
–Roof slabs—Fire resistance Oct. 1955 NL..... 8

Precast units—Combined with slip forms—Finland construction Feb. 1956 NL 26

Prepacked concrete—Bridge foundation Oct. 1955 NL 22

Prestressed Concrete Congress, Second International—Report on Nov. 1955 NL 12

Prestressed members—Precast—Bridge Sept. 1955 NL 10

Pumpability—Factors affecting Mar. 1956 NL 5

Quality control—Pipe manufacture Jan. 1956 NL 9

Radar observation posts—Foundation Mar. 1956 NL 18

Roof slabs—Precast—Fire resistance Oct. 1955 NL 8

Rubber sheeting—Used as form lining to produce patterned surface June 1956 NL 39

Scaffolding—Preassembled pipe—Support for shoring Nov. 1955 NL 6

Shells
–Cylindrical—Filler block used in construction Mar. 1956 NL 10
–Hyperbolic paraboloid—Model tests Dec. 1955 NL 33

Shoring—Preassembled pipe scaffolding used to support Nov. 1955 NL 6

Slip forms—Use in Finland for office and apartment buildings Apr. 1956 NL 26

Stud shear connectors—Composite bridge, Fort Pierre, S. D. Apr. 1956 NL 59

Surface texture—Produced by rubber-sheet form lining June 1956 NL 39

"Survival House"—Design and tests (blast resistance) Feb. 1956 NL 16

Vault—Construction using filler block structural units Mar. 1956 NL 10
